

# BUILDINFOCONSULT INTERNATIONAL

To be successful in the European market, it is important that you have insight into the developments within Europe. Are you working within the European construction or installation sector or the construction or installation materials industry? BouwKennis has gathered all the data you need within the international subscription.

## BUILDINFOCONSULT INTERNATIONAL SUBSCRIPTION

THE INTERNATIONAL SUBSCRIPTION CONSISTS OF THREE PARTS:

- ✓ European Trendreport
- ✓ European Material Flow Dashboard
- ✓ European Management Summary

Based on this information, for example, you can create regional strategies and form clusters of countries such as Scandinavia, Benelux or Eastern Europe. These are countries with a similar building culture and economic situation. With this information you can identify opportunities and make strategic plans.

## EUROPEAN TRENDREPORT

The European Trend Report contains the main trends taking place within the European construction industry. This report was created based on desk research and is structured as follows:

1. A detailed overview comparing all 27 European countries.
2. In-depth analysis per country by means of a DESTEP analysis of the building sector of the respective country.

You will also receive basic figures on the built environment such as:

- › Structure of the housing stock
- › Demographic key figures and forecasts
- › Socio-economic data
- › Economic structure: where does the country earn its money?
- › Structure of the construction sector
- › Construction volume in recent years, where possible divided by segment

### EUROPEAN MATERIAL FLOW DASHBOARD (TRADE AND PRODUCTION)

From a supplier, you would like to have as concrete information as possible about product groups. In the European Material Flow Dashboard, product trade flows are calculated and visualized. We do this using internationally comparable statistics on international trade (NACE) and domestic production (PRODCOM). This provides you with answers to questions such as:

#### 1. Production data at product level in euro and quantity (prodcom codes)

- a. In which country are the final products made?
- b. What is the trend in this, is there a visible shift from this location?
- c. Where are the raw materials made vs. the finished products?

#### 2. Trade dates in euro and quantity (Commodity codes)

- a. How big is the intra-EU and extra-EU market?
- b. Which countries export and import to each other?
- c. What is the trend in this, is there a visible shift from this location?

#### With the European Material Flow Dashboard you can:

- > See the import and export volume between EU countries on an annual basis.
- > Immediately see the production volume of a product group within the various EU countries.
- > Find out how much of your product group is produced in EU countries and how much crosses borders.

### EUROPEAN MANAGEMENT SUMMARY

BuildInfoConsult has developed the European Management Summary to get a quick and well-founded picture of the state of the economy in general and the construction sector in EU countries. This gives you access to the most up-to-date figures on relevant indicators when it comes to:

- > The general economy
- > The housing market
- > The construction market
