

EUROPEAN TRENDREPORT

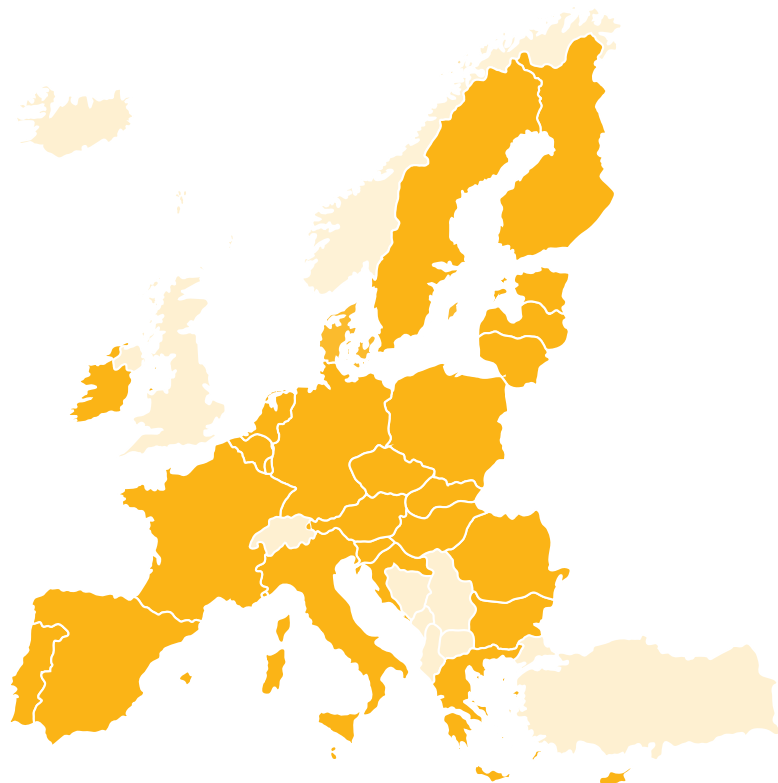

In order to be successful on the European market, it is important that you have insight into the developments within Europe. Are you working within the European construction or installation sector or the construction or installation materials industry? The European Trend Report offers you a clear and quick insight into the trends on the European market.

The European Trendreport contains the most important trends taking place in the European construction industry. This report is based on desk research and is structured as follows:

1. A detailed overview comparing all 27 EU member.
2. An in-depth analysis analysis per country through a DESTEP analysis of each construction sector of the respective country.

You will also receive basic figures on the built environment such as:

- › Structure of the housing stock
- › Demographic key figures and forecasts
- › Socio-economic data
- › Economic structure: where does the country earn its money?
- › Structure of the construction sector
- › Construction volume in recent years; where possible, divided by segment
