

# EUROPEAN MANAGEMENT SUMMARY

The European Management Summary allows you to monitor and compare trends and developments in different EU countries.

The European construction and real estate market has many differences between them. We map the macroeconomic developments of countries within the European Union: from GDP to consumer confidence and the development of raw material prices to mortgage interest rates.

## THE EUROPEAN MANAGEMENT SUMMARY ALLOWS YOU TO

- › Monitor current and potentially interesting sales markets
- › Have all important macro-economic and construction-related key indicators at your disposal
- › Be up to date with the latest economic developments and have quick and easy (numerical) insight on what is going on in different countries
- › Steer international policy based on reliable data
- › Substantiate region targets and export plans for sales countries

## INDICATOREN:

Macroeconomic indicators
Material prices <ul style="list-style-type: none"> <li>- Aluminum</li> <li>- Copper</li> <li>- Gold</li> <li>- Oil</li> </ul>
GDP
Inflation
