

EUROPEAN CONSTRUCTION DATA AND FORECASTS

The European Construction Data and Forecasts dashboard is an interactive companion containing construction data and forecasts. It helps industry professionals monitor and compare trends and developments in different EU countries.

We prepared an exclusive Introduction offer so you can experience the benefits of using a modern construction data-portal.

Developed by BuildInfoConsult, a company that evolved from BouwKennis and USP Marketing Consultancy, this tool brings together the power of digital data models with European construction market expertise. The result? An interactive dashboard that simplifies the complexities of the European construction business, bringing easy and fast market data to your screen.

WHY IS THE EUROPEAN CONSTRUCTION DATA AND FORECASTS DASHBOARD A GAMECHANGER?

› Timely Insights:

Receive the newest available construction market data each month, keeping the latest developments in your sight.

› Reliable Forecasts:

Access trustworthy forecasts for all EU markets, allowing you to plan with confidence and foresight.

› Comprehensive Monitoring:

Monitor and compare all vital macro-economic and construction-related key indicators, gaining a good overview of the market.

› Tailored to Your Needs:

Select the EU countries that are most relevant to your operations, allowing a customized and focused analysis.

› International Strategy Development:

Develop international strategies with reliable data, ensuring that your business decisions are based on a solid understanding of the market.

› Market Exploration:

Track current and potential new markets, enabling you to explore and capitalize on emerging opportunities.

› Target Validation:

Validate your targets and export plans with accurate and up-to-date information, reducing uncertainties in your business strategy.

› Efficient Reporting:

Make faster management reports, saving valuable time and resources.

› Seamless Collaboration:

Share data effortlessly across teams, fostering collaboration and informed decision-making.

Overview of indicators:

Economy	Building market
